

Daniela Lopez

About me...

Daniela is a strategic logistics and international trade professional based in Richmond, Virginia, with a Master's degree in Logistics and International Trade from the University of Barcelona and a background in International Relations from UNAM in Mexico. She brings a global perspective to supply chain and trade operations, supported by multilingual capabilities and international academic and professional exposure.

Professional Biography

Daniela is a Certified Lean Six Sigma Green Belt with a strong focus on process optimization, operational efficiency, and data-driven decision-making. Her expertise spans global logistics, including import/export operations, maritime activities, trade compliance, and HS code classification, developed through project-based consulting and academic initiatives. She has also contributed to research on emerging technologies like AI and Blockchain to improve administrative workflows and reduce container dwell time in global ports.

Bringing this analytical background and a deep passion for international trade, Daniela joined PARAGON Trading Corporation in 2026. In her current role, she contributes to providing a unique and professional experience to all customers, service providers, and suppliers worldwide. Her multilingual capabilities combined with her technical proficiency in Minitab and Python, enable her to solve complex global logistics challenges with a culturally aware and systems-oriented mindset. She is particularly interested in leveraging technology and process improvement methodologies to enhance efficiency in international logistics and port operations.
